

Industrial Power Generation Ltd

Acoustic Containers

IPG manufacture quality custom built ISO Acoustic Containers to your specification. All manufacturing is in house at our purpose built factory in Doncaster, enabling us to have complete control of quality and production of the client's order.

We convert 3mtr, 6mtr and 10mtr ISO and High Cube containers into sound proof walk in housings meeting decibel levels from 65dba as standard. Projects have included acoustic sound levels of much lower decibel levels.

All floors are chequer plate, acoustic linings of zinc plated steel and safe catch door systems as standard. Exhaust systems can be mounted inside or outside of the container. Our range of custom built Exhaust systems will meet any decibel requirement, and can be free sitting or inside an acoustic box.
